

## CREATE AN ACCOUNT IN SENDGRID (server down)

### CREATING ACCOUNT IN MAILJET

**TEAM ID**

PNT2022TMID35705

The screenshot shows the Mailjet dashboard interface. At the top, there's a navigation bar with links for Campaigns, Templates, Automation, Contacts, Stats, and SMS. A user profile for Vignesh Siva Pattur... is visible on the right. The main heading is "Dashboard". Below it, a blue banner indicates a 30-day free trial for Premium Features, with "Upgrade Now" and "Learn More" buttons. A horizontal menu offers options like "Quick setup", "Setup my SMTP", "Manage sender addresses", "Setup domain authentication", and a "Create new..." button. The dashboard features three main metrics: "0 Emails this period", "1 Contacts", and a note "No campaign sent yet" with a "Create a campaign" link. A billing period of "Nov 10, 2022 to Dec 9, 2022" is also displayed.

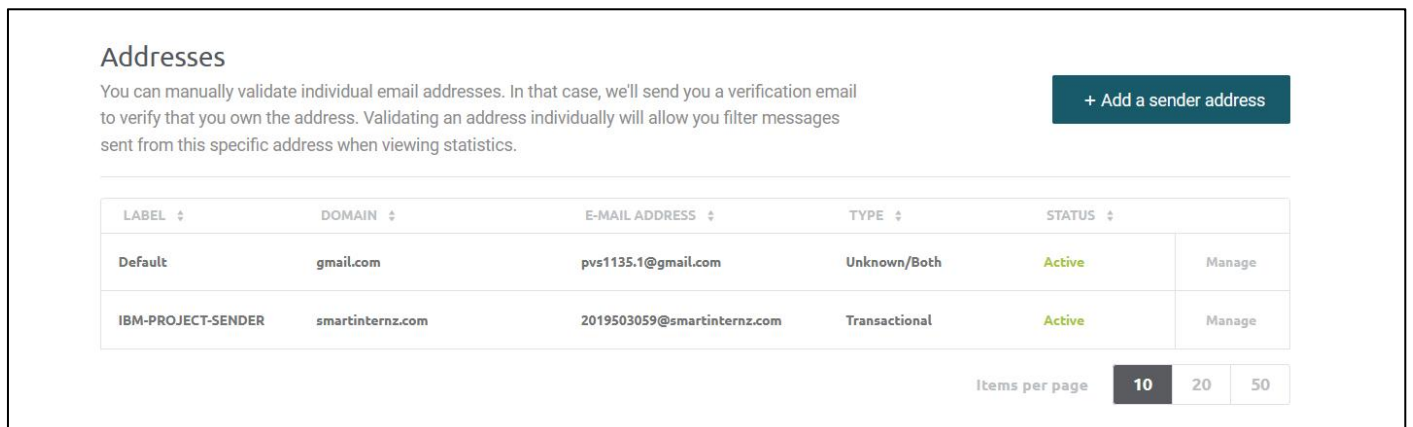

### API KEY

The screenshot displays the "Sub-account API Keys" management page. It includes a search bar labeled "Search by name". Below, a table lists API keys for the "ibm-project". The table has columns for the key name, API KEY, and SECRET KEY. The API KEY is partially masked as "2226\*\*\*\*\*". The SECRET KEY is also masked as "\*\*\*\*\*". There are icons for toggling visibility and a settings gear for each key.

Sub-account API Keys		
ibm-project	API KEY 2226*****	SECRET KEY *****

### SENDER ADDRESS

The screenshot shows the "Addresses" management page. It explains that manual validation of email addresses is required for verification. A "+ Add a sender address" button is located in the top right. Below is a table listing sender addresses with columns for LABEL, DOMAIN, E-MAIL ADDRESS, TYPE, STATUS, and a Manage link. Two addresses are listed: "Default" for "gmail.com" and "IBM-PROJECT-SENDER" for "smartinternz.com". Both are marked as "Active". At the bottom right, there's a pagination control showing "Items per page" with options for 10, 20, and 50.

Addresses

You can manually validate individual email addresses. In that case, we'll send you a verification email to verify that you own the address. Validating an address individually will allow you filter messages sent from this specific address when viewing statistics.

+ Add a sender address

LABEL	DOMAIN	E-MAIL ADDRESS	TYPE	STATUS	
Default	gmail.com	pvs1135.1@gmail.com	Unknown/Both	Active	Manage
IBM-PROJECT-SENDER	smartinternz.com	2019503059@smartinternz.com	Transactional	Active	Manage

Items per page: 10, 20, 50
